Performance

METRICS		Expand view
● First Contentful Paint	0.9 s	● Largest Contentful Paint
● Total Blocking Time	10 ms	● Cumulative Layout Shift
■ Speed Index	1.9 s	

DIAGNOSTICS	
■ Image elements do not have explicit width and height	▼
■ Minify JavaScript — Est savings of 183 KiB	▼
■ Reduce unused CSS — Est savings of 127 KiB	▼
■ Reduce unused JavaScript — Est savings of 452 KiB	▼
■ Minimize main-thread work — 2.1 s	▼
○ Avoid long main-thread tasks — 2 long tasks found	▼

- Modern HTTP ▼
- Optimize viewport for mobile ▼
- Minify CSS ▼
- Avoids enormous network payloads — Total size was 2,078 KiB ▼
- User Timing marks and measures ▼
- JavaScript execution time — 0.9 s ▼
- Avoid non-composited animations ▼
- Page didn't prevent back/forward cache restoration ▼

Accessibility

91

Accessibility

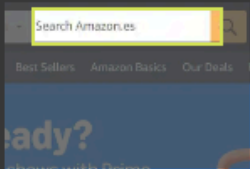

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

ARIA

▲ [aria-*] attributes do not match their roles

Each ARIA role supports a specific subset of aria-* attributes. Mismatching these invalidates the aria-* attributes. [Learn how to match ARIA attributes to their roles.](#)

Failing Elements

Search Amazon.es
`<input type="text" id="twotabsearchtextbox" value="" name="field-keywords" autocomplete="off" placeholder="Search Amazon.es" class="nav-input nav-progressive-attribute" dir="auto" tabindex="0" aria-label="Search Amazon.es" role="searchbox" aria-autocomplete="list" aria-controls="sac-autocomplete-results-container" aria-expanded="false" aria-haspopup="grid" spellcheck="false">`

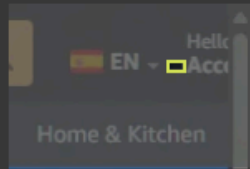

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

BEST PRACTICES

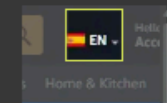

▲ Touch targets do not have sufficient size or spacing.

Touch targets with sufficient size and spacing help users who may have difficulty targeting small controls to activate the targets. [Learn more about touch targets.](#)

Failing Elements

Expand to Change Language or Country
`<button class="nav-flyout-button nav-icon nav-arrow" aria-label="Expand to Change Language or Country" tabindex="0" style="visibility: visible;">`

EN
`<a href="/-/en/customer-preferences/edit?ie=UTF8&preferencesReturnUrl=%2F&ref=topn_" class="nav-a nav-a-2 icp-link-style-2" aria-label="Choose a language for shopping in Amazon Spain. The current selection is E...">`

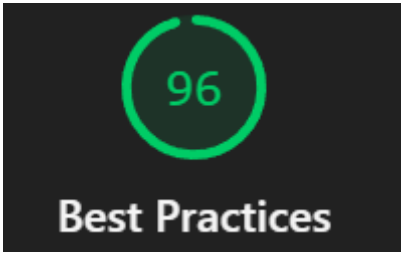

NAVIGATION

▲ Heading elements are not in a sequentially-descending order

- `[aria-hidden="true"]` is not present on the document `<body>` ▾
- `[role]`s have all required `[aria-*)` attributes ▾
- Elements with an ARIA `[role]` that require children to contain a specific `[role]` have all required children. ▾
- `[role]`s are contained by their required parent element ▾
- `[role]` values are valid ▾
- `[aria-*)` attributes have valid values ▾
- `[aria-*)` attributes are valid and not misspelled ▾
- Buttons have an accessible name ▾
- Image elements have `[alt]` attributes ▾
- Input buttons have discernible text ▾

- Links have a discernible name ▾
- Lists contain only `<li>` elements and script supporting elements (`<script>` and `<template>`). ▾
- List items (`<li>`) are contained within `<ul>`, `<ol>` or `<menu>` parent elements ▾
- No element has a `[tabindex]` value greater than 0 ▾
- `[lang]` attributes have a valid value ▾
- Document has a main landmark. ▾
- Deprecated ARIA roles were not used ▾

Best Practices
